Use a unique 'Spirello Only' Kiosk

Why? Because you sell more!

Q: What is a 'Spirello Only' Kiosk?

A: A Sales Booth dedicated to sell Spirellos.

Q: What does that mean?

A: Its main purpose is to sell as many Spirellos as possible out of an inspiring kiosk.

Q: So, you only sell Spirellos out of the kiosk and no other products?

A: The focus is on Spirello. Spirello is a typical impulse product. Guests buy a Spirello on the go. The snack is sold separately or in combination with a drink. Offering hot/cold drinks or some candy is a good idea but applying a cafeteria-approach with an extended menu list is not desirable.

Q: What about counter sales?

A: We do not recommend this. Selling Spirello next to other fried snacks, hamburgers, fries, or as a supplement with a menu undermines the exclusivity of Spirello. And don't forget, Spirello is an extra snack moment for the guest, in addition to the standard mealtimes.

Q: Can you show some examples of 'Spirello Only' Kiosks?

A: See the pictures at the right. The Spirello FoodCottage Plug & Play (designed and built by Spirello BV) best reflects what Spirello stands for. If this is not feasible, we will be happy to help you convert one of your existing sales stand into a Spirello kiosk.
